oracle part boxes
predicates $\phi(x)$
36 bound part–attribute literals
logistic readers, val-isotonic
Boolean tree head
CART depth 12, K classes
Setting T / Setting D
certified reason R
$R \models c$, minimal, exact
engine cross-cross-check 472/472
the audit — one rung per row
rung 1 · proof
R sufficient for the tree
✓
exact
by construction; independent engine agrees 472/472
rung 2 · fidelity
tree ↔ neural teacher
≈
measured
0.81 at 4 classes / 0.61 at 10 — partial, not binding
rung 3 · premise support
cited literals true of the image
✗
measured
0.254 → 0.017 (4 → 200 classes); always below accuracy — binding
gate · the lever
calibrated min-confidence abstention
deployment
restores support at partial coverage; pays coverage
the K-curve is Fig. 1(b); rung 3 carries its endpoints only
